PROFESSIONAL SUMMARY

Full-stack software engineer with 5+ years of experience building reliable, end-to-end products across the frontend, backend, and cloud. I design clean architectures, ship maintainable code, and care about performance, security, and developer experience.

Much of my work is in the fintech space, where I currently develop, maintain, and customize the world's leading anti-money-laundering platform for a top-tier client. I've owned architecture decisions, mentored peers, and delivered complex systems in pension management, digital banking, and financial crime prevention with international teams — turning ambiguous requirements into clean, scalable solutions.

EXPERIENCE

Senior Software Engineer
Jan 2023 – Present
Arrowhead Development
Novi Sad, Serbia

- Embedded with a top-tier fintech client to develop, maintain, and customize the world's leading anti-money-laundering (AML) platform by market share.
- Built and extended frontend modules with Vue.js in a micro-frontend architecture, integrating with backends across MSSQL, PostgreSQL, and OracleDB.
- Owned architecture and delivery for customer-facing modules, reducing defect rates and review cycles through TDD and rigorous code review.
- Mentored engineers and led code reviews, while contributing to CI/CD pipelines (Jenkins) and AWS deployments for a high-reliability production platform serving financial institutions worldwide.

Software Engineer
Apr 2021 – Jan 2023
UnderIT
Novi Sad, Serbia

- Built full-stack web applications and internal tools for international clients, owning features across the frontend, API, and database layers.
- Developed responsive, accessible UIs in React and Vue, backed by Node.js REST APIs and SQL databases.
- Introduced CI/CD automation and containerized deployments, cutting release time and improving delivery reliability.

SELECTED PROJECTS

Anti-Money-Laundering Platform — *Fintech / Financial Crime*

- Development, maintenance, and customization of the market-leading AML solution used by financial institutions worldwide to detect and prevent money laundering and ensure regulatory compliance.
- **Stack:** Vue.js · Micro-frontend Architecture · MSSQL · PostgreSQL · OracleDB · AWS · Jenkins · TDD

Internal Risk Notification System — *Digital Banking*

- Secure, one-way communication platform for risk teams to broadcast critical alerts to branch offices nationwide: React admin panel, .NET Core API, and a lightweight WPF tray app, with LDAP-based authentication inside a closed banking network.
- **Stack:** React · .NET Core · WPF · LDAP · REST APIs · Windows Services

Pension Fund Web Portal — *Pension Management*

- Secure portal for managing pension accounts and client portfolios: authentication, account overviews, transaction history, and digital document access, built for high availability and financial-data compliance.
- **Stack:** TypeScript · React · Node.js · REST APIs · Docker · CI/CD · PostgreSQL

Franchise CRM & Review Analytics Platform — *CRM / Analytics*

- Led development of a CRM platform for franchisers across 10 countries, delivering review analytics and customer insights to support data-driven decisions.
- **Stack:** React · Node.js · Redis · MySQL · CI/CD · AWS

TECHNICAL SKILLS

Frontend	HTML5, CSS3, SASS/SCSS, Tailwind CSS, JavaScript (ES6+), TypeScript, React, Next.js, Vue.js, Responsive Design, Accessibility (WCAG), PWAs, SEO
Backend	Node.js, REST APIs, GraphQL, WebSockets, Microservices, Authentication (JWT, OAuth, SSO), API Design & Documentation
Databases	PostgreSQL, MySQL, OracleDB, MongoDB, Prisma, Data Modeling, Schema Management & Migrations
Cloud (AWS)	EC2, S3, RDS, Lambda, EKS, CloudFront, Route 53, IAM
DevOps	Linux, Docker, Nginx, Reverse Proxies, Load Balancing, CI/CD, Jenkins, GitHub Actions, Infrastructure Automation
State & Testing	Redux, Zustand, React Query / TanStack Query · Jest, Vitest, Cypress, Playwright, TDD
Engineering	System Design, Software Architecture, Performance Optimization, Security Best Practices, Code Reviews, Agile, Technical Leadership

EDUCATION

Master of Professional Studies (MPS) Oct 2021 – Oct 2023
Higher Education Technical School of Professional Studies, Novi Sad

Bachelor of Professional Studies (BPS) Oct 2018 – Jun 2021
Higher Education Technical School of Professional Studies, Novi Sad

LANGUAGES & AVAILABILITY

Serbian (Native) **English** (Professional working proficiency)

Availability: Open to remote and hybrid roles; experienced working with distributed international teams.
